Prepared September 11, 2024

Seller: SRI International

Offering: Network Security Blacklist

Description:

1 US issued patent covering network cybersecurity and the generation of network address blacklists. Blacklists represent a collection of Internet Protocol (IP) addresses that have been deemed undesirable. This patent is useful for enterprises analyzing behavior and IP addresses for creating predictive blacklists.

There are no encumbrances on the patent except for a nonexclusive license to the US Government (Govt funded invention).

More package details are available upon request.
